Raymond Sauter

I am a detail-oriented, organized and meticulous employee. That works at fast pace to meet tight deadlines. Also an, enthusiastic team player ready to contribute to company success. As well as, a complex problem-solver with analytical and driven mindset. Dedicated to achieving demanding development objectives according to tight schedules while producing impeccable code. I'd like to finish by saying Since I just received my associates in computer science and am receiving my B.S. within the near future, I am seeking to maintain a full-time position that offers professional challenges utilizing interpersonal skills, excellent time management and problem-solving technical skills.

threats.

 Utilized intelligence collection platforms and analysis techniques to identify and document intelligence gaps.

2022-04 - TMII Technician/Advanced Fiber Current Technician

Beckton Dickinson, Queensbury, NY

- Performed preventive maintenance of Fiber Flattener equipment.
- Performed troubleshooting and equipment testing to identify and correct problems end to end and network-wide.
- Installed and configured new devices and system components.
- Read blueprints and schematics to correctly place equipment.
- Planned layouts and ran cable into buildings and through walls, attics, and crawl spaces.
- Responded to service requests during and after business hours.
- Worked closely with network administrators and server engineers to deliver quality service.
- Worked effectively in fast-paced environments.
- Organized and detail-oriented with a strong work ethic.
- Demonstrated creativity and resourcefulness through the development of innovative solutions.
- Proven ability to learn quickly and adapt to new situations.
- Passionate about learning and committed to continual improvement.
- Excellent communication skills, both verbal and written.
- Gained strong leadership skills by managing projects from start to finish.

2021-04 - Owner/Computer Programmer

Signwave Technologies, Lake Luzerne, NY

Provided technical support using knowledge of

- complex technology to solve problems and support new projects.
- Tested and deployed scalable and highly available software products.
- Designed new product elements such as image recognition, hand writing recognition, audio, video and device-to-device communication.
- Built databases and table structures for web applications.
- Tested server code to validate code changes.
- Updated documentation with project deviations to capture changes.
- Wrote virtualization apps to automate virtual machine orchestration.
- Implemented scripts to enhance user experience.
- Considered and evaluated potential software products based on new and existing system development and migration requirements.
- Authored code fixes and enhancements for inclusion in future code releases and patches.
- Designed and implemented scalable applications for data extraction and analysis.
- Contributed to codebase used in software deployment on multiple virtual machines.
- Performed regression and system-level testing to verify software quality prior to release.
